The Trickster is also a very useful piece (I think you need to pay for the greater range) and the Protege is just great if you can use it on someone who's not too skilled. I've had the Enforcer for a while now and its still just as great as always. The Trickster is very useful and you never know when you'll need the longer range that it offers. I believe it may be the cheapest gun in the game still, excluding the Protege which is slightly more expensive. The Enforcer was the first gun I got for this game. I'm happy with it. It does have some downsides. It's quite slow to fire. The sight is also a bit inaccurate at long range. 82157476af
